

PEDIATRIC PSYCHOLOGY POSTDOCTORAL FELLOWSHIP

SCOTTISH RITE

SCOTTISH RITE FOR CHILDREN

Scottish Rite for Children trains physicians, pediatric psychologists, and allied health professionals in multiple pediatric orthopedic disciplines. Scottish Rite's history of excellence includes expert, compassionate care and leading-edge research, making the health care organization the perfect place for pediatric psychology fellows to receive their advanced training.

U.S. News & World Report has repeatedly recognized the achievements of Scottish Rite for Children, consistently ranking the hospital, in conjunction with Children's Health, among the leading pediatric orthopedic facilities in the U.S.

SCOTTISH RITE FOR CHILDREN

Scottish Rite for Children opened its doors to the children of Texas in 1921 after a group of Texas Masons approached Dallas' first orthopedic surgeon, W. B. Carrell, M.D., about caring for children with polio. For nearly 100 years since that auspicious beginning, more than 300,000 patients have been treated, and the facility has emerged as a world leader in pediatric orthopedic research, treatment and education. The hospital primarily cared for children with polio until the 1950's when the Salk and Sabin vaccines virtually eradicated the disease in the Western Hemisphere. This allowed the medical staff at Scottish Rite to expand treatment for a wide range of orthopedic conditions.

Now led by the fourth chief of staff, Daniel J. Sucato, M.D., M.S., and President/CEO Robert L. "Bob" Walker, Scottish Rite is one of the nation's leading pediatric orthopedic centers. The facility treats a wide range of orthopedic conditions, including sports injuries and fractures, as well as certain arthritic, neurological and learning disorders, such as dyslexia. The multidisciplinary approach to care tailors treatment to the individual needs of each child and family. Through the generous support of friends in the community, patients are treated regardless of their families ability to pay.

After 97 years at the same Dallas location, Scottish Rite opened a second facility within the larger Dallas-Fort Worth Metro area. The Scottish Rite for Children Orthopedic and Sports Medicine Center is located in Frisco, Texas. This facility offers orthopedic outpatient clinics, a fracture clinic which accepts walk-in patients with no physician referral, a leading-edge Movement Science Lab with specialized capabilities for sport-specific training and testing to be co-located with several state-of-the-art physical therapy gyms. The Frisco campus has operating rooms for day surgeries, as well as shelled space for future growth. There are also on-site radiology services, dedicated space for psychology, an infusion lab and other ancillary patient services.

Scottish Rite for Children Orthopedic and
Sports Medicine Center, Frisco

THE SETTING

The philosophy of patient-centered care extends beyond treatment, to research and education. In Scottish Rite's six Centers for Excellence, researchers are investigating pediatric orthopedic conditions while programs like the Fellowship in Pediatric Psychology prepare psychologists for a successful career in pediatric psychology.

The Pediatric Psychology Postdoctoral Training Program is offered through the Psychology department of Scottish Rite for Children at our Dallas and Frisco campuses. Licensed psychologists and affiliated staff with expertise in pediatric psychology and behavioral health coordinate and participate in interdisciplinary health care, related teams, committees and research. Direct clinical inpatient and outpatient services are provided to Scottish Rite patients, families and caregivers. The Psychology department is committed to quality clinical care and healthy child development despite the stress and demands associated with the child's health-related condition.

Manifesto

**A Place Like
No Other**

POSTDOCTORAL FELLOWSHIP IN PEDIATRIC PSYCHOLOGY

OUR PEDIATRIC POSTDOCTORAL FELLOW HAS THE OPPORTUNITY TO:

- **Work in a collaborative environment with a focus on learning.**
- **Work on numerous multidisciplinary care teams.**
- **Care for children with a wide array of pediatric orthopedic, neurologic and rheumatologic conditions.**

The Psychology department at Scottish Rite for Children offers a one-year Pediatric Psychology Postdoctoral Fellowship. The fellowship is designed to prepare doctoral-level psychologists to practice in an inpatient or outpatient pediatric setting. The fellowship provides clinical and research training in pediatric psychology, including subjects such as adjustment to acute and chronic illnesses/injuries, surgery preparation and education, pain management, adjustment to long-term hospitalization, and rehabilitation. Training is provided in clinical consultation/liaison, crisis intervention, pre-surgical evaluations and brief outpatient treatment. Specific patient populations include but are not limited to, children with acute, procedural, and chronic pain, rare orthopedic conditions, sport-related injuries, neurological disorders and rheumatological disorders.

The Psychology department is committed to evidence-based practices and the scientist-practitioner model. Therefore, the fellow will be offered opportunities to engage in collaborative research with fellowship supervisors and other staff. An independent research project is expected to be completed by the end of the fellowship year.

PHILOSOPHY OF THE PROGRAM

The goal of the fellowship program at Scottish Rite for Children is to train professional psychologists who have a particular interest in pediatric psychology, with a niche focus on orthopedic conditions. The program is designed to promote the development of clinical competence with children and families, with sensitivity to and facility with cultural differences, ethical issues, interdisciplinary relationships, and the changing environment of health care.

The Postdoctoral Fellowship in Pediatric Psychology subscribes to the scientist-practitioner model, employing evidence-based practices, integrating science and practice where principles of behavior, cognition, and psychosocial adaptation are applied within the context of pediatric health care. The psychology staff works collaboratively with other disciplines to conduct high quality of clinical care. In addition, staff and the psychology fellow are involved in research projects designed to advance the field of pediatric psychology.

Our primary goal is to provide a dynamic, supportive environment for training postdoctoral fellows by encouraging creativity, flexibility and understanding of how medical conditions impact children and families, ultimately preparing them for advanced practice in pediatric psychology.

The fellowship adheres to the nine profession-wide competencies set out by the American Psychological Association's Standards of Accreditation for Health Services Psychologists and has included another competency that is unique to postdoctoral fellows. These standards are essential for performing all services in the field of psychology.

These competencies include:

1. Research
2. Ethical and Legal Standards
3. Individual and Cultural Diversity
4. Professional Values, Attitudes, and Behaviors
5. Communication and Interpersonal Skills
6. Assessment
7. Intervention
8. Supervision
9. Consultation and Interprofessional/Interdisciplinary Skills
10. Management/Administration and Leadership

GOALS AND OBJECTIVES

Goal #1 Acquire advanced knowledge, assessment skills, and intervention skills necessary to effectively treat pediatric patients within a health care system.

1. Fellow will develop a range of diagnostic skills, including interviews, history taking, risk assessment, child protective issues, diagnostic formulation, triage and referral.
2. Fellow will develop skills in psychological intervention, including environmental interventions, crisis intervention, short-term individual psychotherapy and behavioral medicine techniques.
3. Fellow will develop proficiency with pre-surgical evaluations and education.
4. Fellow will develop proficiency in culturally competent clinical care and will gain experience working with patients from diverse cultural, ethnic and religious backgrounds in health care settings.

Goal #2 Develop scholarship and research skills consistent with the scientist-practitioner model of our program that will prepare the fellow to pursue a career in pediatric psychology.

1. Fellow will integrate science and practice in assessment, intervention, consultation and the development of research.
2. Fellow will use research methodologies characteristic of pediatric psychology research to design a research study that informs evidence-based practice and considers issues of diversity.
3. Fellow will provide education, skill development and training in pediatric psychology for trainees from a variety of disciplines through didactic presentations and/or presentations on clinical, research, or professional issues.

Goal #3 Acquire advanced knowledge and skills in consultation and knowledge of pediatric psychology within a health care system.

1. Fellow will develop proficiency in psychological consultation through individual cases and participation in multidisciplinary teams. This includes consulting with: parents, medical staff (e.g., physicians, nurses, social workers, PT, OT, etc.), school systems and the legal system. Consultation training occurs in both the inpatient and outpatient settings across the Scottish Rite campuses.
2. Fellow will appreciate important professional, ethical and legal issues related to providing mental health services within a medical setting.

Competencies expected for postdoctoral fellows are outlined within the goals and objectives noted above. These competencies are consistent with APPIIC guidelines, as well as with the APA Standards of Accreditation in Health Service Psychology suggesting advanced practice in the areas of patient care, medical knowledge, practice-based learning and improvement, interpersonal and communication skills, professionalism, and systems-based practice. This fellowship satisfies the requirements for licensure in the state of Texas.

tsbep.texas.gov

DESIGN OF THE PROGRAM

Our training program is intended to provide a planned, programmed sequence of supervised training experiences. The program begins with onboarding, followed by four major rotations (two to three months each) across the Dallas and Frisco campuses. The Fellow's daily schedule varies depending on consults received in the Psychology department and his/her/their current rotation. The fellow will elect four immersive experiences over the course of the training year. It will likely include attending clinics, seeing patients in the clinic setting, brief individual and family outpatient therapy, rounding on inpatients, participating in educational activities and collaborating with other hospital staff. The fellow will have a primary rotation (four days per week) and a half-day of limited outpatient appointments. The fellow will attend weekly training sessions (didactics, rounds and journal clubs), engage in research, participate in two to three hours of supervision per week and on-call coverage as assigned. Supervisors will be determined based on rotation.

TENTATIVE ROTATION SCHEDULE

PEDIATRIC PSYCHOLOGY DIDACTICS

Schedule	Topic
1	Working in an Interdisciplinary Setting (Integrated Care)
2	Assessment of Suicide
3	Chronic Pain: Overview and Intervention
4	Faculty Case Presentation
5	Rheumatology: Overview and Intervention
6	Ilizarov Treatment
7	Ethics
8	Faculty Case Presentation
9	Diversity
10	EOS, Halo, Growing/Magec Rods Surgery Prep
11	AIS and PSF Surgery Prep
12	Faculty Case Presentation
13	Fellow Case Presentation
14	Hip Dysplasia and PAO Surgery Prep
15	Ethics
16	Faculty Case Presentation
17	Diversity
18	Sports Medicine
19	Transitional Care
20	Faculty Case Presentation
21	Diversity
22	Early Career/Entering Work Force
23	Supervision Models/Being a New Supervisor
24	Ethics
25	Fellow Case Presentation

Didactics are presented by staff psychologists unless otherwise noted. The fellow is expected to present on clinical cases twice during the training year. Depending on their rotation, the fellows may have the opportunity to develop didactic presentations.

Schedule is based on bi-weekly didactics meetings following a preset list of topics.

MEDICAL ROUNDS AND CONFERENCES

Activity	Day	Time	Hours
Orthopedic Conference	Every Tuesday	7:00-8:00 a.m.	1/week

Orthopedic Conference is held every Tuesday from 7:00-8:00 a.m. Conference topics highlight different conditions treated at the hospital. Etiology, assessment, treatment and disease course are discussed. The postdoctoral fellow is expected to attend these didactic seminars to learn more about the various conditions.

Psychology Research Conference	Fourth Tuesday	8:00- 9:00 a.m.	1/month
---------------------------------------	----------------	-----------------	---------

Psychology Research Conference is a monthly meeting where the postdoctoral fellow and the faculty review current and future research studies where the Psychology department is involved.

Pediatric Psychology Didactic Seminar	Every Other Tuesday	8:00-9:00 a.m.	2/month
--	---------------------	----------------	---------

Please see the Didactic Schedule for specific topics. Postdoctoral Fellows are expected to participate in these didactic seminars, which may include an interdisciplinary group of other providers, trainees, staff and administrators.

Fellow Research Project	Variable	Variable	1/week
--------------------------------	----------	----------	--------

The Fellow Research Project is a supervised, year-long project. Postdoctoral Fellows are expected to work with a faculty supervisor and research coordinator to carry out a research project in a planned and sequenced manner.

Grand Rounds / Sports Rounds	Every Friday	6:00-8:00 a.m.	1/week
-------------------------------------	--------------	----------------	--------

Depending on the rotation, the postdoctoral fellow will attend post-operative rounds with the orthopedic or sports teams. Both sessions will include cases that the fellows has been involved with during preoperative assessments.

TRAINING PLAN, SUPERVISION AND EVALUATION

TRAINING PLAN

The Pediatric Psychology Postdoctoral Fellowship is a planned, programmed sequence of supervised training experiences leading to the development of competencies necessary for advanced practice in pediatric psychology. The postdoctoral fellow and his/her/their supervisors will develop an Individualized Training Plan (ITP) at the beginning of the fellowship. The plan will ensure that the fellow obtains adequate experience and exposure to the various emphasis areas, specifies independent project(s) and considers special interests and training needs. The ITP will delineate clinical activities, rotations and supervisors, involvement in the emphasis areas, didactics, conferences, rounds, educational opportunities and time to prepare for the licensure examination. The postdoctoral fellow will be expected to acquire core competencies by the end of the training year. The formal training program will follow a structured supervision model beginning with the observation of and modeling by licensed psychologists, proceeding to co-consult, and finally, independent practice under supervision. The time and exact process will vary depending on the ITP of the fellow.

SUPERVISION

Individual supervision will occur formally for approximately two to three hours weekly with each rotation supervisor. There is significant supervision, particularly at the beginning of the training year, which will occur informally in clinics and on the inpatient unit. Specifically, our department will be using the Patient Ask Recommendations See Evaluate (PARSE) Model for consultation work. These specifics will be addressed and formalized at the beginning of each rotation with each supervisor. The fellow will have an outpatient clinic supervisor, a consultation supervisor and a research supervisor. Throughout the year, the fellow will receive supervision of his/her/their clinical practice, teaching and training, scholarship and professional development. Supervision will transition from focusing on clinical issues to the use of a consultative clinical supervision model as the fellow establishes his/her/their professional development as a pediatric psychologist.

EVALUATION PROCEDURES

There will be three evaluations of the fellow's performance completed by his/her/their major rotation and outpatient supervisors following the completion of each rotation. Feedback on competencies related to each particular rotation will be provided following case presentations, didactic presentations, journal club presentations, research presentations and record reviews. The postdoctoral fellow will also complete ongoing self-assessments of their skill development to facilitate reflective practice. Modifications will be made to the ITP as needed. The fellow will also create a portfolio to keep track of their formative and summative feedback.

PEDIATRIC PSYCHOLOGY SEMINAR SYLLABUS

This year-long didactic seminar will address topics that highlight many of the health conditions treated at Scottish Rite for Children and focus on the competencies that form the knowledge base for pediatric psychologists. Each presentation will seek to provide the fellow with an understanding of the scientific foundation underlying the practice of pediatric psychology, knowledge and appreciation of the core facets of clinical child psychology, the ability to identify the contextual influences on child health and illness, and will provide an overview of the medical literature that helps to guide our practice. The fellow will gain knowledge of the familial influences on child health, an understanding of the systems and contexts that affect child health and illness, and an appreciation of the benefits and difficulties of working within an interdisciplinary setting. Further, cultural and social influences on clinical presentations will be emphasized.

OUTCOMES

- Increase fellow's knowledge of a broad range of pediatric/child health psychology topics.
- Delineate the types of psychological services provided by pediatric psychologists.
- Critically evaluate pediatric psychology literature.
- Understand the competencies expected of pediatric psychologists at a postdoctoral level of professional development.
- Foster an awareness of the critical issues (both research and clinical) in the field of pediatric psychology.

FELLOWSHIP REQUIREMENTS

FELLOWSHIP REQUIREMENTS

- Attend all weekly training sessions (didactics, rounds and journal clubs).
- Participate in two to three hours of supervision per week.
- See up to five outpatients per week.
- Assist with covering assigned clinics.
- Inpatient coverage as assigned.
- Complete a research project during the course of the year.
- On-call coverage as assigned.

DUE PROCESS
PROCEDURES

PERFORMANCE
EVALUATION FORM

FELLOWSHIP RESEARCH REQUIREMENTS

The Psychology fellow will be expected to complete the following research requirements prior to the completion of training:

- Participate in an ongoing study at Scottish Rite for Children or design and get IRB and RAP approval to initiate a new study.
- Review and prepare data for analysis and interpretation.
- Identify target conference(s) to submit research OR complete a manuscript and submit for publication consideration.

All fellows at Scottish Rite for Children are required to participate in monthly meetings with the medical and research staff to review the status of fellow projects. The Psychology fellow will also participate in the monthly Psychology department research meetings and journal club.

Please note: if the fellow should choose to start a new study, the timeline for completion must account for IRB/RAP submission and approval time. This can take up to four months. If this is chosen, it is recommended that a retrospective study be completed to ensure completion of study-related activities during the fellowship year.

POSTDOCTORAL PEDIATRIC PSYCHOLOGY FELLOWSHIP

The Pediatric Psychology department at Scottish Rite for Children in Dallas, Texas is currently accepting applications for one (1) full-time pediatric psychology postdoctoral position from August 30, 2021 - August 26, 2022. The fellow participates in a full range of didactic training experiences, including a pediatric psychology seminar, an orthopedic conference, post-operative rounds, a hand conference and clinical team rounds. Based on interest, the fellow will have the opportunity to participate in faculty research projects. The fellow is also provided with protected time for licensure preparation.

Graduation from an APA-accredited psychology doctoral program and completion of an APA-accredited pre-doctoral internship is required. Candidates from clinical, counseling and school psychology programs are welcome to apply. Applicants must be able to provide a letter from their graduate program indicating that their degree will be conferred by August of the year they will begin fellowship training.

Benefits include: health and dental insurance, paid time off, access to an on-site gym and wellness classes, on-call pay and other benefits. The position is funded through a market-competitive annual stipend. A relocation stipend is also available.

Additional information about the hospital is available at: scottishriteforchildren.org

General questions or inquiries can be directed to:

Emily B. Gale, Ph.D., L.P., ABPP via email at Emily.Gale@tsrh.org or phone at 214-559-7566

Application Deadline: December 16, 2020.

Applications are due December 16, 2020, though early applications are strongly encouraged. Complete applications will be reviewed on a rolling basis. Once a completed application is submitted, applicants will be contacted to schedule a 30-minute initial screening interview with one to two department staff psychologists. Following the screening interview, applicants will be notified of a formal invitation to interview by **January 8, 2021**. Formal interview invitations will be sent out via email. Interviewees will have the choice of two dates: **January 12, 2021 or January 22, 2021**. Applicants will be invited to interview via Microsoft Teams or phone.

Consistent with APPIC recommendations, **we will be offering exclusively virtual interviews**. The interview day will start with a general welcome, overview of the training program, introduction of staff and rotation overviews. Next, individual interviews will be conducted by two members of the training staff. During the interview, applicants will be asked to respond to general questions related to their prior experience, training, crisis intervention, brief therapy and consultation/liaison skills. Applicants will be provided with approximately 10-15 minutes for questions. Additionally, an optional follow-up question and answer session can be scheduled with the Training Director following the last interview date if additional questions remain.

REQUIRED APPLICATION MATERIALS

1. Curriculum Vitae.
2. Three letters of reference (including one from internship supervisor).
3. Cover letter that includes a statement of interest.
4. Clinical writing sample of no more than 5 pages that is de-identified and represents the applicant's professional writing ability.
5. Graduate transcript. Please send all materials with the exception of references in PDF format in one email to Emily.Gale@tsrh.org.

RELOCATION TO DALLAS

Amazing Food

Dallas is a foodie's dream. Dallas chefs take risks and create their own twists on traditional food. The restaurants here are authentic, unique and funky. Plus, there is something for everyone! Love burgers? Try out Twisted Root Burger in Deep Ellum. The tables are made out of bottle caps, the atmosphere is laid back, and the burgers (available in beef, buffalo, turkey and vegan options) are perfectly cooked and packed with flavor. Are street tacos more your scene? Wander over to La Ventana in Downtown, where you can feast on burritos or taco bowls on the sunny patio for only a few dollars. Whatever your stomach desires, Dallas delivers!

No State Income Tax

That's not a typo! Texas is one of only seven states in the U.S. that doesn't have a state income tax.

Professional Sports Scene

Who doesn't love the Dallas Cowboys? Known fondly as "America's Team," the five-time Super Bowl champions run, kick and sweat it out at the AT&T Stadium just west of Dallas. If basketball is more your style, we've got the Dallas Mavericks. Our NHL team, the Dallas Stars, and our MLB team, the Texas Rangers, each have loyal and active followings as well.

A Neighborhood for Everyone

Whether you love the sights and sounds of the city or prefer quick access to the great outdoors, Dallas has a neighborhood for everyone. Central Dallas will give you access to the newest businesses and restaurants, East Dallas is a kayaking/paddleboarding/running haven and West Dallas is an eclectic mix of old and new.
